Wie man in 402's Blog nachlesen kann arbeitet IW nun an einer Lösung des Cheat-Bugs:

PC Cheat Exploit Fix In The Works

I also wanted to note for our PC players, we're currently working on a fix for the PC cheat exploit that many of you reported to us after the 1.6 patch. Thanks to everyone for their quick response in getting us information on it. The programmers are currently addressing it and I'll update you when you can expect the fix to hit servers as soon as I know.
