Friday 05.18.2012 [12:00PM]

We are aware that many Mac users are having problems since Version 2.301 of the PB Client for COD4 was released for auto-update on Monday. Unfortunately for those users, a manual update may be required. To manually update, Mac users should close COD4 if it is open and then download mc002301.mac. Then use Finder to move mc002301.mac into the pb/dll folder inside the COD4 application (you may have to right-click the COD4 icon and "Show Package Contents" in Finder to browse through to "pb" and then "dll").

Aktuelle Version:

**Server v1.828 | Client v2.301 A1407**

Evenbalance hat ein Update für den Punkbuster von **COD:WaW** veröffentlicht:

### Clientupdate
